Simple If else statement

Conditional Statement

```
a = 30
b = 40

if(a>b):
  print("a is greatest number")
else :
  print("b is greatest number")
```
```
    b is greatest number
```

```
a = int(input('Enter the first number:'))
b = int(input('Enter the second number:'))

if (a>b):
  print("{} is greater number".format(a))
else:
  print("{} is greater number".format(b))
```
```
    Enter the first number:250
    Enter the second number:150
    250 is greater number
```

if elif else statement

```
a = 15
b = 25
c = 30

if (b<a>c):
  print("a is the greatest number")
elif (a<b>c):
  print("b is the greatest number")
else:
  print("c is the greatest number")
```
```
    c is the greatest number
```

Nested if statement

```
a = 20
b = 40
c = 60

if(a>b):                    #identitation matters
  if(a>c):
    print('a is greatest number')
  else:
    print('c is greatest number')
else:
  if(b>c):
    print('b is the greatest number')
  else:
    print('c is the greatest number')
```
```
    c is the greatest number
```
